the tutor).	
D. Communication skills	1
On successful completion of the programme students	

should be able to:	
1) effectively present and defend their own ideas,	Students acquire skills 1–4 during study
concepts, suggestions, both orally and in written form;	of all courses. This determines the
2) present, to argue and to defend their own concepts	choice of corresponding methods of
and views in discussion with opponents;	teaching and learning as well as
3) deliver information, ideas, problems and solutions,	assessment methods.
clearly and unambiguously, to both specialist and non-	
specialist audiences, promote their ideas in their	
organization and beyond;	
4) use communication and management skills to	
improve efficiency and achieve the objectives of their	
organizational unit (department) and the enterprise	
(organization).	
Teaching and Learning	Assessment methods
Seminars, discussions, group work, defence of projects	Seminar-based assessment,
and course works, business games, case studies,	presentations, course work and project
internships, defence of contest papers, writing and	defence, reviewing articles, provide
publishing research articles and conference reports,	feedback on contest papers, evaluating
conference presentations, roundtables, discussion of	Master's thesis performance.
papers and articles in groups and with a tutor, defence of	
the Master's thesis.	
E. Learning skills	
On completion of the programme students will be able	Skills 1-7 are developed in all courses
to:	and related to relevant teaching and
1) independently and creatively work out theoretical and	learning methods and assessment
practical material;	methods as appropriate. Self-directed
2) independently find important sources of information	learning forms and requirements for
for educational, research and professional needs;	independent search and use of a wide
3) to produce, process, summarize, analyze and present	range of sources are the elements of all
information in accordance with specific goal;	courses.
4) carry out research on the basis of information	
technology;	
5) submit results of their research in the form of	
scientific articles and conferences reports;	
6) develop obtained learning skills for continuing their	
study in a manner that may be largely self-directed and	

autonomous;\	
7) determine the direction and stages of lifelong	
learning, improve their own professional skills.
